

For Startup - We offer Cost Effective Top Developers

A wide global network makes enable us to provide Cost Effective Top Developers for your project . With partners in the US, India, Dubai, Bosnia and China we can deliver in most areas and frameworks to market leading prices.

Atius Consulting have over time developed a wide network of partners within IT. All with their speciality. This network together with our own consultants are a cost effective solution.

Our prices are market leading, without any compromises on the competence or quality. With a large network comes a lot of experience. This will benefit you as a customer by having knowledge and experience that may be reused and therefore save time and money.

The life of a start-up is surrounded with a struggle to find recourses, time and money. Although we have market leading prices it may still be a challenge with finances. For you as a start-up we can offer discounts and Co-Finance as a service.

Do you need as little as a few hours consultancy or a dedicated team, dont hesitate to contact us. No project is too small for us to engage. And we do engage with commitment, result and quality.

Prototyping

Do you have an idea? let us develop a first prototype. With a prototype you can evaluate your idea and have something to show customers, investors or other stakeholders.

A prototype can be developed in as little time as 50 - 100 hours, all depending on functionality, framework, native, hybrid or web.

Case 1 Mobile application - Uber like application

Developed an android application to manage rides and user data with specific request, time and distance. The application worked as an communication path between multiple drivers and users (passengers), which is divided by geographical boundaries, to collaborate and spread relevant information related to rides.

Features: One time login, GPS-tracking, payment management, user management, book ride and view profile of driver

Techniques: Android 6.3.0, PHP Codeigniter HMVC, MySQL Server

Case 2 - Mobile application - Emergency assistance

Developed a mobile application as an essential tool that would help the users to make the most of their Emergency Assistance membership, and also for the members whose organization offers the app to their travelers and expatriates. With the Assistance App, travelers and expatriates would have a world of capability in their hand and this medical and travel security app shall be integrated into a global assistance infrastructure.

Features: Multi languages, mobile friendly, interactive information, Push notifications, settings menu

Techniques: Xamarin, .Net, C#, SQLite, MS SQL Server, HTLM, CSS3, Bootstrap

Co-Financing for Start-ups

Since we want to work closely with Start-ups and be a long-term partner in IT solutions, we want to contribute what we can to facilitate start-ups. One way of doing this is through Co-financing, where we reduce and subsidize development costs against something in return. The return could be shares, exclusive agreement in IT-services, options or other services. our aim is to find a win-win situation for all parties and a long-term partnership.
